  - Define roles
    - Team Lead: Tyson Johnson
    - a note taker/task scheduler: Nithila Neethi Devan
    - assignment reviewer/submitter : Alizeh Murtaza
  - Discuss choices and ranking of the two project topics
    1) Topic J : How can we use patient data to predict the likelihood of developing Type 2 Diabetes?
    2) Topic H: How can a hospital optimize the allocation of its resources to improve patient outcomes?
  - Submit assignment

Meeting Minutes *(use additional slides if needed)*

Date: 01/24/2026

Participants:

- Tyson Johnson
- Nithila Neethi Devan
- Alizeh Murtaza

Agenda:

- Discuss positions/roles within the team
- Discuss data source options
- Future Assignment Planning

Notes:

- Team Selected Topic J (Type 2 Diabetes) as project focus
- Potential Data Source : South Korean Government Data Portal
  - Tyson has existing logic to translate data via Python to English.
- Literature Review Requirement: Each member should find 2-3 sources prior to next meeting; we can discuss strongest sources/what to include during the next meeting.
- Team has decided to continue with virtual meetings; next meeting is set for Jan 31st at 5pm (flexible)

Meeting Minutes - Tasks *(use additional slides if needed)*

Task No.	Task Name	Description	Owner	Date	Status
T01	Collect Potential Sources	Each team member will find 2-3 sources for the literature review for discussion during next meeting.	Tyson, Nithila, Alizeh	00/00/2026	Started
T02					
T03					
T04					
T05					
T06					
T07					

Note:

- Status: Not started, Started, Waiting on Name of person, Date Completed
- For more tasks, add rows to the table by right clicking on a cell in the last row and choose from the horizontal menu “Insert Rows Below”
- Keep the same table for the following week(s) and add more rows
